

# Develop A Python Script

Date	7 November 2022
Team ID	PNT2022TMID05224
Project Tittle	Smart waste management system for metropolitan cities.

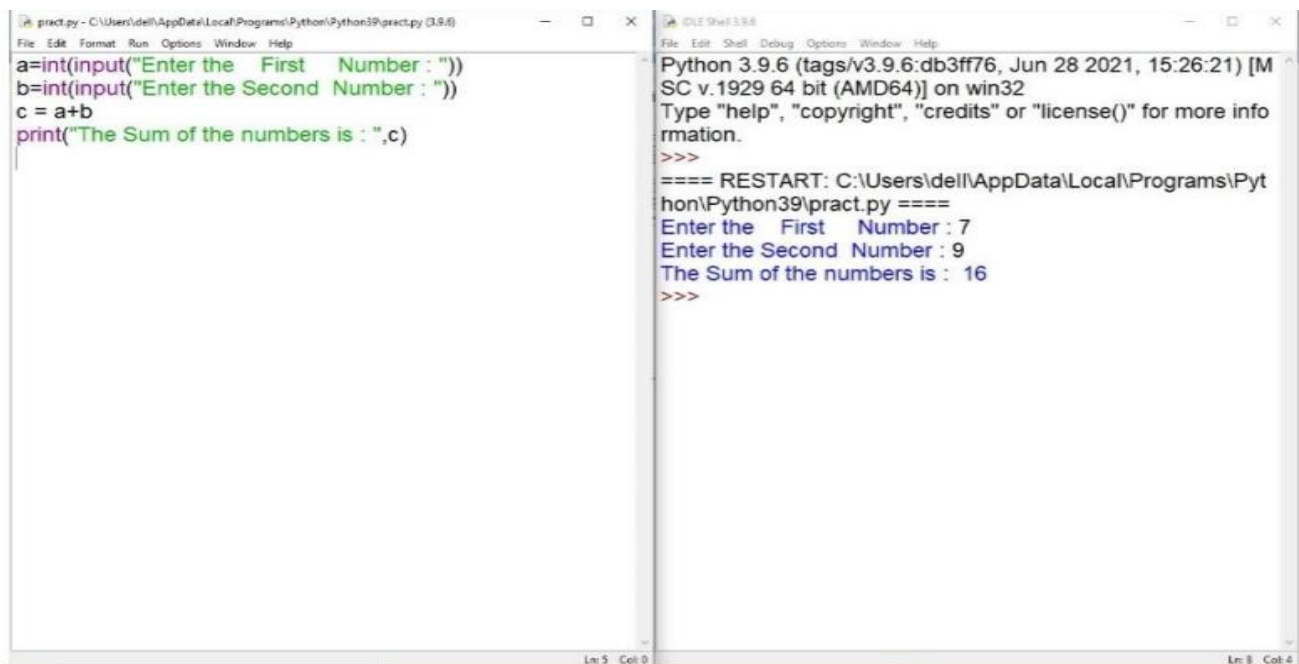

## Script:

```
a=int(input("Enter the First Number : "))
```

```
b=int(input("Enter the Second Number : "))
```

```
c = a+b
```

```
print("The Sum of the numbers is : ",c)
```

The screenshot displays a Python script in an IDE. The left pane shows the code: `a=int(input("Enter the First Number : "))`, `b=int(input("Enter the Second Number : "))`, `c = a+b`, and `print("The Sum of the numbers is : ",c)`. The right pane shows the execution output: `Python 3.9.6 (tags/v3.9.6:db3ff76, Jun 28 2021, 15:26:21) [MSC v.1929 64 bit (AMD64)] on win32`, followed by a restart message, and then the user input `7` and `9`, resulting in the output `The Sum of the numbers is : 16`.
